threestrand

Setting up Threestrand

About ten minutes, best done sitting next to the person you'll pair with.

THE STEPS

1. **Get the app**
   Scan this, or search Threestrand in the App Store or Google Play.

2. **Type your name**
   First name is fine. Use the same name on the sign-up sheet.

3. **Pick how you'll use it**
   With a partner (your spouse or a friend), or as a family. One of you is the partner who says yes when the other asks for an app.

4. **Create your account**
   Email, Google or Apple sign-in. Either is fine.

5. **Pair up**
   Share your code or link with your partner, or enter theirs. One side entering is enough.

6. **Pick what stays open**
   Everything else pauses until you ask. Use the list on the right and aim for 50 or fewer. iPhone can keep at most 50 open; Android has no hard cap, but 50 is still a good target. On iPhone, pick apps one at a time rather than a whole category, which can add dozens at once.

7. **Say yes to the permissions**
   iPhone asks for Screen Time. Android asks for accessibility, usage access, notifications and to make Threestrand the home screen. It needs all of them to work.

8. **Put your name on the sheet**
   Best done at the table tonight. If you finish setting up later, text or email me the name you typed in the app by **Wednesday night**: (469) 507-9615 or harry@getthreestrand.com. Either way you're covered. Nothing to pay.

IDEAS FOR WHAT TO KEEP OPEN

The picker is the hard part. Nobody knows what to tick the first time. Walk through these and pick the ones you actually use.

Talking to people
Phone, Messages, WhatsApp, FaceTime, email

Getting around
Maps, Uber or Lyft, roadside assistance, parking

Money
Your bank, Venmo or Zelle, Wallet, budgeting

Daily life
Calendar, Clock and alarms, Weather, Notes, Reminders, Calculator, grocery list, the store apps you actually use

Home
Alarm system, cameras, thermostat, garage

Kids and school
School and sports apps, kids' activities, carpool, anything you use to coordinate pickups

Health
Fitness, Health, pharmacy, doctor portal

Media you choose on purpose
Music, podcasts, audiobooks, Bible app

The basics
Camera, Photos, Settings, App Store or Play Store

Start small. It's hard to get the list right the first time. Expect to ask your partner for a few things you forgot in the first two days. That's normal, and they say yes in one tap. You also get a couple of emergency passes a month for when they can't answer.

Most people pause: social media, news, YouTube, games, shopping for fun, and the browser (ask when you need it).
